

Tree Planting

In the month of February 2006 we have planted 500 pine trees on and around the course. The two different species are between 1.25 and 2.50 metres high.

On one hand these trees replace those that got lost in the century storm in 2001 and at the same time are placed to fill up some of the generous rough areas around the course. Especially on the back nine between holes 10 and 13, the idea was to "define" better the different holes and penalize more bad tee shots.
